

**Fisherton House Medical Practice,
Fountain Way, Salisbury**

Completed in January 2014, this 53 week project for Salisbury Medical Practice, provides a brand new innovative Health Centre where two local surgeries; 'Grove House and 'New Street' are now able to offer their services from under one roof. In addition local residents are also provided with a dental surgery and in-house pharmacy.

Work on the Medical Practice initially commenced with the demolition of existing redundant structures and the subsequent construction of a new BREEAM Excellent, two-storey building using a cross laminated timber frame.

In addition, part of the previous 'ballroom' structure was underpinned in a logistically difficult but ultimately hugely successful operation to create a 192 m2 basement area.

a building reputation...
