

Cleavelands Medical Centre, Bishop's Cleeve, Cheltenham

This project comprised the construction of a new Medical Centre, built within the heart of the new housing estate at Cleavelands in Bishop's Cleeve. This state-of-the-art Centre saw Seven Posts Surgery in Prestbury and Greyholme Surgery in Cleeve's village centre come together on the new site, with the two original surgeries closing shortly afterwards.

The two-storey building, is built to modern, spacious, comfortable specifications offering around 1,100m² of space. It has 14 clinical rooms, including consulting and nurse treatment rooms, training room as well as a suite for minor operations and an onsite pharmacy.

Alongside this is another three clinical rooms ready to be used as the population grows and demand increases. There is also the potential for dentistry services to be provided and reception and administration staff will benefit from first-rate facilities.

The two-storey steel frame medical centre will include:

- Pharmacy
- Administration/Meeting rooms
- Reception and waiting areas
- Clinical rooms

New drainage and associated mechanical and electrical works will form part of the scheme, along with new landscaping.

Client: Bishops Cleeve Medical Centre Ltd

Value: £2.65m

Completed: January 2019
