

**Fusion Leisure, Ivybridge**

Ivybridge Leisure Centre has undergone a major redevelopment whilst remaining operational.

Phase 1 was completed in November 2018 with a complete refurbishment of the building and its systems. The sports complex has been expanded with a larger spin studio, a centrally located café, a new fitness studio and squash courts.

Phase 2 involved an extension to create an innovative six-lane Open Sky swimming pool with a sundeck and a state-of-the-art retractable roof combined with modern, sustainable swimming pool technology.

The Open Sky swimming pool structure comprises a steel structure, high-grade insulated aluminium walls and the retractable roof above the pool.

Careful logistics planning has been essential on this project given that the first phase refurbishment was undertaken within live areas of the building. Health and Safety of staff and public has been paramount as well as ensuring facilities are provided to enable the day to day functioning of the facility to be maintained.

This project is our third scheme with Fusion Leisure having previously undertaken the refurbishment of Wells Leisure Centre and Frome Leisure Centre, both completed in 2016.

**Client:** Fusion Leisure  
**Value:** £4.0m  
**Completed:** January 2020
